CAREER SUMMARY

- **Versatile Mainframe Developer-turned-business professional** with **6.4 years in BFSI & Healthcare** holding **Certified Scrum Master (CSM)** and **Certified Scrum Product Owner (CSPO)** credentials and is pursuing **PMP**
- Brings global leadership from a **10-member team across Europe & Asia**, aligning senior stakeholders on **roadmaps** and **workflows**: **25% faster delivery**, **£1.5M annualised value**, **30% customer-acquisition growth**
- Solves ambiguous business problems from **first principles** with a **customer-obsessed** product toolkit: **product discovery**, **user journey mapping**, **high/low-fidelity prototyping**, **A/B testing** and compelling **storytelling**
- **AI-fluent** problem solver who uses **AI-first tools** (ChatGPT, Claude, Gemini) to power case-competition preparation and daily academic work, and is building hands-on skills in **Google Colab**
- Serves as elected **Class Representative** of **103 peers**; builds community through **100+ volunteer hours** at Red Cross and support for **200+ defence personnel** via NWWA; dives (PADI), sails and kayaks

PROFESSIONAL EXPERIENCE — 06 Years 04 Months

HSBC Software Development India — ***Mar 2020 – Apr 2023***

Software Engineer

Delivery Leadership & Stakeholder Management

- Spearheaded a cross-functional, geographically dispersed team of 10 across HSBC Europe & Asia to deliver financial products and enhancements, achieving 25% faster project delivery and increasing operational throughput by over £2M annually through rigorous road mapping, sprint workflows, and Agile best practices.
- Partnered with C-Suite stakeholders and Scrum Masters to prioritise the **product roadmap**, refine **business requirements** and optimise **release planning**, cutting **project delivery time by 25%** and unlocking **£1.5M in annualised business value** through strategic planning & executive storytelling
- **Orchestrated end-to-end backlog grooming &** ran product discovery & backlog grooming as lead Agile practitioner across 3 multi-region teams on JIRA & Confluence – sprint completion +20%, velocity +35%, feature delivery cut from 6 to 4 weeks

Quality, Analysis & Process Improvement

- Strengthened release quality by reviewing **120+ test cases** and conducting **user acceptance testing (UAT)**, reducing **post-launch issues by 40%**
- Diagnosed and restructured critical **data models** through **root cause analysis**, raising **release efficiency by 35%** and cutting **data-related issues by 20%**, saving an estimated **£800K annually** in post-launch remediation costs
- Eliminated recurring error patterns using **Lean Six Sigma** and **Ishikawa analysis**, reducing the **error rate by 12%**

Automation & Data Security

- Replaced manual processing of critical financial data with an **automated encryption-decryption pipeline**: **22% faster processing**, stronger **data-security compliance** for HSBC UK; adopted as standard by **3+ project teams**

Infosys Limited | Client: Aetna (US Health Insurance) — ***Dec 2016 – Mar 2020***

Senior Systems Engineer

- Delivered **tailored insurance plans** end-to-end for Aetna's **37.9M+ member base** using **Agile and Waterfall** methods, driving a **30% customer acquisition growth** and establishing a scalable product foundation ahead of the **$70B CVS-Aetna merger (2018)**
- Compressed **software development lifecycle by 20%** - orchestrating full life-cycle delivery from requirements to production, ensuring **100% regulatory compliance** and system readiness for seamless **CVS-Aetna merger** integration; delivering solutions that exceeded both business expectations and federal healthcare standards
- Mobilised a **cross-functional testing coalition** of third-party vendors and internal teams to de-risk launch, achieving a **95% issue resolution rate** and **22% fewer customer complaints**
- Architected and programmed scalable **Mainframe applications** and backend systems, improving **operational capability by 30%** and cutting **processing time by 25%**; directly contributing to post-merger synergy targets of **$750M in cost savings**

Systems Engineer

- Engineered **mission-critical Mainframe solutions** Aetna's insurance pipeline — **eliminated 20% system downtime** across claims, billing & policy systems, protecting **$200M+ in operational continuity**
- Translated complex insurance requirements into customised software solutions through rigorous stakeholder collaboration - **driving 25% operational efficiency gains** and directly contributing to **Aetna's $1B+ cost optimisation agenda**
- Instituted end-to-end **testing protocols** with **Accenture** as QA partner; ran **unit and integration testing**, achieving **97% functionality at launch** and **100% milestone adherence**
- Orchestrated **zero-disruption deployments** into Aetna's insurance infrastructure, safeguarding systems processing **$15B+ in annual premiums** with **100% regulatory compliance** at every release
